To Whom it May Concern,

As the Executive Director of Congregation Beth Shalom I have had the pleasure of working very closely with Ferry Electric Company from 1997-1998. Our Synagogue had a devastating fire which resulted in a nine million dollar build out. The dedication and commitment which Ferry demonstrated with the electrical design and installation in our eighty-eight thousand square foot facility was truly remarkable. Their attention to detail and their concern for the safety of our membership and its' children were all above and beyond the call of duty. I would heartily recommend using Ferry Electric Company on any and all building programs.

Sincerely,

Amir Pilch, F.S.A.
Executive Director
Congregation Beth Shalom
