**Re: PPG Monroeville Industrial Park**

Dear Jim:

I felt it was important to send you a letter to let you know what an outstanding job Jim did at the above-referenced project. He may not have told you, but this was a very complicated project with a short time frame and at best mediocre to non-existent electrical information. However, thanks to Jim's persistent attention to detail and personal involvement in almost every aspect of this job it was completed on time and the owner and architect are quite happy with the outcome.

I can't overemphasize how important Jim's contribution was to this being a successful project and what a pleasure it is to work along side him.

Best wishes for your continuing prosperity in 1998.

Sincerely,

Over 40 Years of Building Reputation and Structures
